

FOREST LAKE DAM SPILLWAY UPDATE

June 4, 2020

Our engineering firm for the temporary spillway repairs has consulted with the State of Michigan EGLE Dam Safety Unit and has recommended that we close the road over the dam until further notice. Road closure is required to minimize the potential of further damage to the spillway which could impact the dam structure.

Therefore effective today the dam road will be closed to all vehicle traffic including golf carts and ATV's. Our Security and Maintenance vehicles may utilize the road on a limited basis. The road will be temporarily reopened in the future when the Arenac County Road Commission repairs the damaged section of North Forest Lake Drive.

Pedestrians and bicycles will be allowed on the road except during periods when construction activities are in progress. Be safe and stay off the road whenever you see construction personnel or vehicles.

We apologize for the disruption to normal travel routes, but we have no other options at this time.
