

Update #32 Sept 19, 2022

FLPOA Dam Spillway weekly update

The EGLE review of our permit application remains in process. While we still have not received a formal response to our 16th submission, it was however another active week of discussions and planning with USDA, Fisher Contracting, EGLE and FLPOA. During the discussions with EGLE, we requested issuance of a multi phased permit which would allow us to begin demolition of the damaged spillway and site prep work while we continue to address any remaining questions behind the scenes about the spillway design and thus move forward with the project. We received encouraging feedback about a possible multi phased permit.

Dan LeFevre
FLPOA Board President
