

Mike Woloson

Hello neighbors! My wife, Pam, and I found this community back in 2017. We purchased a couple vacant lots with the dream of building one day. In 2019 we purchased lake front property that required extensive remodeling and yard work. Even though we still have much to do, we have enjoyed the rebuilding. We have made many new friends and love Forest Lake. This is a true community with an up north twist. I am very hands-on in both my professional and personal life. I have worked in the automotive industry my entire career which will be 41 years this fall. My main function has been in business development, engineering and account management. My skill set includes the ability to assess and determine a way forward in situations and building relationships to accomplish goals, all the while utilizing my common sense approach to completion. Yikes - that is a lot of words to explain I like to get things done!

I am still working and manage to come to our place almost every weekend. We are less than two hours away downstate at this time and sometimes come up just for an evening. We are invested in Forest Lake and would love to make this our permanent home in the future. When I am not working, my interests are construction, camping, hiking, hunting, BBQ and just enjoying the outdoors as much as possible. We are thrilled at recently becoming first time grandparents and our adult children also enjoy visiting Forest Lake. With my hands-on approach to things, I believe my skills can be used to serve the board and the members of FLPOA. There is a rich history among those in this community from which I can learn much. My interests are in preserving the lake and the forests in our association.

I look forward to the opportunity to serve on the board and contribute to this wonderful community.
